

My dearly loved school

April, 20

Some words about my school

Studying and learning new things are very interesting activities. I like getting information on different topics. To become an intelligent person you should read books, work hard at school, consult your tutors to get better knowledge. I like going to school. I would like to share some interesting facts about my school.

I study in the Lyceum №56 in Novouralsk. It is situated approximately in the centre of our town, it takes me 10-15 minutes to get to school. It is a rather big building painted orange and brown-red with 2 floors. There is a gym here, a canteen which is a meeting place for a lot of pupils, an assembly hall, a library and a lot of rooms for studying. Our cloakrooms are rather big, halls are spacious and there are small sofas there. We have a lot of plants near our studying rooms. They create healthy and cozy atmosphere.

Our headmistress

Our headmistress is a very talented and kind person, her name is Natalia Valentinovna Tomchenko, she can understand everything and help when we have problems. For sure she is our leader.

My favourite place is my form mistress' room. It's spacious, with different placards, a lot of useful books and our classroom corner. I like Olga Nikolaevna's teaching methods, we are like her real children, she loves us a lot as well as we do. We stay here after classes sometimes and talk about interesting things that we learnt at the lessons.

Our classrooms and activities

The next thing I like most about our school is our library - you can stay there reading books and attend different classes on a lot of topics. I like borrowing books from the library, it's convenient and I can exchange books very often. I also take part in competitions on different types of reading and events like this under Luidmila Nikolaevna's supervision.

Talking about the canteen I should say that I like the food there: the portions are rather big, delicious and well-cooked. I always want to get some more but I respect our cooks' work.

Our gym is well-equipped and spacious. We train there a lot. I like sports, it gives me strength. Sometimes we compete there, I am always excited when we win.

Our IT classes are well-equipped and we learn a lot about computers there, I like it very much. Sometimes I don't have an access to the Internet at home, I can go there and do all my tasks.

There are a lot of competitions where we participate in our school. They are intellectual as well as sporting. We have a lot of opportunities to show our good and excellent results on our town's level. First we take part in contests at school, then in town and the last stage is the region. I would like to be the best in our school but I have to work a lot.

Our activities after classes are very different: we attend the Centre of Extra-Curriculum Activities, go to sports clubs, visit museums and theatres not only in our town but in Yekaterinburg as well. We go camping with Olga Nikolaevna and the classmates and spend a lot of time together.

All in all, I like my lyceum very much, it's my second home. I would like to finish this school with excellent marks and enter a good university. I am glad that all my teachers are very competent, helping, trustworthy and reliable. I wish luck to all the people who work and study in my school! Let it exist and flourish for centuries!
